Council Meeting

A Council Meeting was held this week.

The following resolutions were passed.

The application for Restaurant License were granted to:

Carbon Cafe

City Cafe

Joe Lang

C. W. Gibson

L. Jacobson

J. W. Baird

That the Mill Rate to be reduced to 5 Mills on the Dollar for the current year.

That the Culvert between Gray St. and Elgin Avenue to be widened as it is dangerous as it is at the present. Also Rosebud St. be graded as it is dangerous and that the Dams that are in the ditch on Rosebud St. be let out and kept out.

FOOTBALL

CARBON vs NIGHT- INGALE

The Carbon boys visited Nightingale on Sunday last and the game ended in a draw 2-2. On account of poor refereeing the game almost ended in a free-for-all. A little stern handling on the part of the referee and the game would be a real good game. Owen scored both goals for Carbon.

Carbon's next game will be at Carbon on Wednesday next Aug. 16th. Our opponents will be Nightingale and after the game the football team are going to put up a real dance. Nightingale Four Piece Orchestra will be on hand and the admission will be \$1.00 Watch for dance posters.

Mr and Mrs H. A. Evans, Miss Koester, Miss Kettleson and Mr George McNeil have motored to the coast.

The Presbyterian congregation have started the basement for the new manse on Aberdeen Ave.

Mr and Mrs Fred Morrison left on Wednesday for Toronto where they will spend a vacation.

Mr Bill Cardiff of Edmonton formerly of Carbon is spending several days here.

Miss Cecelia McNeil left Thursday for her home in Swalwell.

Miss May Williams is spending her vacation at Peace River.

Mr H. Gaetz returned Thursday after spending the week in Edmonton.

Mr McQuade has had quite an improvement made in finishing up Wilson's Bakery.

Mr and Mrs Torrance and daughter are visitors to Calgary this week.

Miss Kathlyn Reever is leaving Miss Williams who is on her vacation.

Spend Fifty Millions On Canada's Highways In Five Year Period

Ottawa.—Fifty million dollars will have been spent on improving Canada's highways when the five-year period terminates in the fall of 1923, according to reports received by A. W. Campbell, Dominion Commissioner of Highways. Of this total twenty millions will have been appropriated by the Dominion Government and the remainder by the different provinces. Of the federal sum there is yet \$800,000 to be taken up by the provinces.

Agreements have already been entered into by the province of Ontario calling for an expenditure of \$12,500,000 by the end of 1923, of which sum five million is the federal share.

The New Brunswick Government have now all of their appropriation of three million under agreement, the Dominion Government contributing \$1,200,000. A total of 1,595 miles of highways is on the programme for improvement. Alberta, the last province to take part in the national highways scheme, has just filed for approval plans for roads improvement under the Canada Highways Act. All the provinces are now working under the general regulations provided by the act, and the work throughout these provinces is now being carried out in accordance with the uniform standard specifications.

Royal Family May Return to Bavaria

Socialists Protest Against Removal of
Ban on Exiles

Berlin.—The Bavarian Government issued a decree intended to replace, so far as Bavaria is concerned, the legislation recently passed by the Reichstag for the defence of the republic. The decree omits the clauses in the Reichstag enactment relative to the establishment of a special tribunal, the competence of the German minister of the interior to prohibit meetings and suppress associations, and the competence of the Central Government to prohibit members of the former ruling house now living abroad from entering Germany. It also declines to allow non-Bavarian police to take independent official action in Bavaria.

The Socialist section of the Bavarian landtag has issued a manifesto declaring every attempt to counteract the Reichstag legislation for the defence of the republic is an attack upon the political unity of the nation, while the Bavarian insistence upon special rights in this connection has caused alarm in Northern Bavaria, as well as in Berlin.

Australia Will Find Work for Unemployed

Government Offers to Spend
\$10,000,000 Unifying Railway
Gauges

London.—Premier W. M. Hughes, of the Australian Commonwealth, according to a Reuter despatch from Melbourne, in replying to a deputation of unemployed men, said that the Commonwealth Government was ready to spend £2,000,000 on the unification of the railway gauges in Australia and thus give work to large numbers if an agreement could be reached with the various Australian states.

Those Having Sick Animals Should Use

**MINARD'S
"KING OF PAIN"
LINIMENT**

Good for all throat and chest diseases, Dis-temper, Garget, Sprains, Bruises, Colic, Mange, Spavins, Running Sores, etc., etc. Should always be in the stable.—SOLD EVERYWHERE.

Strike Bargain With Rating Companies

Railroads of Britain Reduce Yearly
Expenses by £2,000,000

London.—The railway companies in Great Britain have secured a remarkable bargain from the rating authorities. Pleading serious loss of revenue they persuaded the National Union county assessment committee to make large reductions in the sums demanded from them for taxes.

Every parish through which a railroad passes levies tax rates upon the company on the basis of the assessment, which is broadly determined by the revenue of the company. The reductions granted possibly average 25 per cent., representing an aggregate saving to the railway companies of over £2,000,000 a year.

Grain Shipments for Europe

Fifty Million Bushels Creates New
Record for Montreal Port

Montreal.—Figures supplied by the Grain Clearance Board of this port, show that from the opening of navigation to the evening of July 23, almost 50,000,000 bushels of grain were shipped to Europe from Montreal, a performance that creates a new record, exceeding that of last year by nearly two million bushels. The record of last year, when 138,453,980 bushels, or nearly fifty millions more than were shipped from any other port on the North American continent, will probably be exceeded this year at the present rate, M. P. Fenner, general manager of the port and chairman of the Grain Clearance Board, said.

Will Consolidate Soldier Settler Loans

Converted Into One Loan for 25-Year
Period

Edmonton, Alta.—Of great importance to the large number of soldier settlers in the west is the announcement that all the loans made by the Government prior to April 1, 1922, will be consolidated into one loan for a period of 25 years. This applies where a veteran has made three separate loans, stock, equipment and farms. Men established between October 1, 1919, and October 1, 1920, will have three years' grace in interest payments, and men established between Oct. 1, 1920, and October 1, 1921, will have two years' grace.

Germans Must Destroy Range Finding "School"

Buildings Established at Strategic
Points on Kiel Canal

Paris.—The Council of Ambassadors decided to send a sharp note to the German Government demanding the immediate destruction of the fire control and range finding school, which the German naval authorities have quietly established at strategic points on the Kiel Canal. Allied experts opinion has declared the school is convertible into a fort commanding the entrance to the canal.

Conference May Be Delayed

Washington.—Negotiations with financial representatives of Great Britain for funding of that country \$5,000,000,000 war debt to the U.S. scheduled to begin early in September, may be deferred until the latter part of that month, it has been indicated at the treasury.

Three members of the allied debt funding commission will be away from Washington during the first part of September, it was explained.

May Authorize Sale of Vodka

Moscow.—A decree authorizing the sale of vodka, which has been prohibited since 1914, is expected to be issued on Aug. 1. The pre-war strength of vodka was 48 per cent. alcohol; under the new decree the strength will be 38 per cent., and the manufacture will be undertaken as a state monopoly.

Alberta Legislature Con- siders Wheat Board Bill

Must Be Satisfied With Personnel of
the New Board

Edmonton.—Disposing of the customary debate on the speech from the throne with unanimous approval of a resolution to accept and express appreciation of His Honor's address, moved and seconded by A. B. Claypool, Didsbury and G. N. Johnstone, Coronation, the Legislature launched directly into consideration of the wheat board bill, the rules being waived to enable Hon. J. E. Brownlee, Attorney-General, to propose the second reading of the measure and give an explanation of the bill.

Before the debate was adjourned by Hon. J. R. Boyle, leader of the Liberals, he drew from Hon. Mr. Brownlee the admission that while the Legislature will be asked to enact enabling legislation for the Dominion Wheat Board, the Government will retain discretionary powers as to whether or not the credit of the province shall be pledged to the undertaking, it being conceded that the Government must be satisfied with the personnel of the board named by the Government at Ottawa, or the board will not be supported by the province.

Mr. Boyle also asked Premier Greenfield to give the House further details of the probable cost of financing the wheat board project, declining to proceed with the debate until such details had been furnished. The Premier read to the House a telegram which he had received from James Stewart, Winnipeg, and concurred in by F. W. Riddell, Regina, to the effect that the operations of the board might involve the credit of the province anywhere from \$3,000,000 to \$15,000,000. This would, of course, be taken care of by a line of credit established at the banks under guarantee. Mr. Stewart's opinion was that under conservative operation, and following the procedure of the wheat board of 1919, a line of credit of from \$3,000,000 to \$5,000,000 would suffice.

Colliers Honor Memory of Comrades

New Waterford, N.S.—All the colliers here were idle and special services were held in St. Agnes Church in memory of more than sixty miners who lost their lives in the New Waterford mine explosion five years ago, July 25, 1917.

U.S. Ambassador Visits Pope Pius

Rome.—Pope Pius received in private audience Henry Morganthau, former U.S. ambassador to Turkey, and had a long conversation with him about his experiences at Constantinople during the early days of the war.

HOARSENESS RUBBED AWAY QUICKLY BY NERVILINE

Changeable weather causes congestion and sore throat. The blood must be drawn from the inflamed part, and this is speedily done by applying Nerviline. The beauty of Nerviline is that it penetrates quickly. It is not oily and every drop sinks right in. It draws out the inflammation, eases the pain, makes the chest and throat well quickly. For relieving coughs, colds, hoarseness, Nerviline is the proper remedy. Thousands say so. Large 35c bottles sold everywhere.

Actual Removal Of The Cattle Embargo Only Matter Of Time

Deny Reports Of

Syrian Revolt

Officials Say News of Rioting Was
Greatly Exaggerated

Paris.—Reports received from Cairo by way of London that an attack on French troops in Syria and serious rioting followed news of the confirmation of the French mandate for Syria are greatly exaggerated. It was declared in official circles here. Reports that the rioting bordered on revolt were denied.

Cairo.—The Syrian committee here announces that when news that the League of Nations Council had confirmed the French Syrian mandate was received in that country a band of Syrians attacked French troops at Saurain, killing two officers and 17 men, destroyed two tanks and captured a number of prisoners and quantity of war material. The French are reported to have been forced to retreat until reinforcements were hurried from Damascus.

The Syrians also are reported to have brought down a French airplane at Esrah and to have attacked a French outpost at Jayroud, killing 15 Frenchmen. The committee alleges that disorder has broken out in the whole of Syria.

Extend Rural Phones

Providing for Further Phone Con-
struction in Rural Alberta
Sections

Edmonton.—Contracts for 1,100 miles rural telephone line construction have been awarded by the provincial telephone department, comprising the second instalment of the Government's programme for the 1922 season. The mileage represented in these contracts, six in number, is spread over all parts of Central and Southern Alberta, and the total expenditure involved will be about \$125,000.

It is expected that the 1,100 miles of new lines will almost or entirely complete the work to be done this year in the way of rural telephone construction. Some 1,400 miles of similar construction had already been done on previous schemes, for which contracts were given in the early part of the season as the cost of which was about \$150,000.

Morden Team Wins

Awards Given in Boys' Livestock
Judging Competition

Brandon.—The boys' livestock judging competition of the provincial exhibition carrying with it the James McCurdy Memorial Cup, has been won by the Morden, Man., district boys team, with a score of 1,006 points. Elgin was second, two and a half points behind the leaders. Eleven teams competed in the competition, which comprises the judging of heavy horse, beef and dairy cattle, sheep and swine. Each team was allowed twenty minutes to complete the awards.

A Holstein cow owned by W. Hepburn, of Virden, Man., has established what is believed to be a record for Manitoba for production. This cow's record for the past year, as shown by a test just completed, totalled 26,013 pounds of milk.

Germans Land Cargo at Australia

London.—Although the official embargo against importation from former enemy countries to Victoria, Australia, does not expire until August 1, the first consignment of German cargo to reach Australia since 1914 is now being landed. The Victoria Government gave official notification on June 9, that the ban on importations would be lifted on the first of August.

Protest of Veterans

Regina, Sask.—Protest of Saskatchewan veterans over the failure of the federal authorities to appoint a western representative on the commission to investigate the pension charges made by the Great War Veterans' Association were forwarded to Grant McNeil, Dominion G.W.V.A. Secretary, by the provincial body here.

London.—The debate in the House of Lords indicates that the peers are inclined to regard the actual removal of the embargo against Canadian store cattle as only a matter of time and some strong advocates of the embargo manifested a disposition to accept the situation.

Proceedings were a continuance of the debate started on July 12, when Lord Chaplin presented a resolution urging the maintenance of the embargo and Lord Lincolnshire moved a resolution demanding the fulfilment of the pledge of 1917 that the embargo would be removed. The weight of the speech of July 12 were decidedly against any change of policy, but sentiment, it was shown, on the issue, has undergone a remarkable change in the meantime.

After a considerable array of prominent peers had addressed the House, the Lord Lincolnshire amendment favoring unconditional removal of the embargo was voted down by 91 to 53, but the House adopted the Lord Long amendment as a substantive resolution, accepting the conclusions of the Finlay Royal Commission that Canadian herds were free from the plague of pleuro-pneumonia and foot and mouth disease, and expressing the opinion that steers from the Dominions might be admitted as store cattle subject to quarantine precautions.

Lord Ancaster, who represents the Board of Agriculture in the upper chamber, made it quite plain that he anticipated legislation lifting the embargo and that he was only anxious that their removal of the embargo should be accompanied by certain safeguards.

"I recognize," said Lord Ancaster, "that the tide is against us, and that we have to expect legislation later. I can only hope that if there is a reversal of our present policy the effect may not be as serious as some suppose."

Report of Progressive- Liberal Fusion

Much Doubt Is Expressed As To Its Probability

Ottawa.—Statements published in Quebec that 52 Progressives, members of parliament, had announced their willingness to join the Liberal party, are received here with reserve. It is generally understood that there were some kind of pourparlers between some Progressives and some Liberals looking to closer co-operation, but it has been stated positively that there was no agreement reached of any binding character. It is regarded, as well established, there was no offer of "unconditional union" with the Liberal party.

Winnipeg.—"The weather must be pretty hot down there. The whole thing is a dream," said Hon. A. B. Hudson, K.C., member for South Winnipeg, interviewed here in connection with the report that he had been instrumental in converting 52 Progressive members in the federal house, to the Liberal party, and that he would enter the cabinet.

BEAUTY OF THE SKIN
is the natural desire of every woman, and is obtainable by the use of Dr. Chase's Ointment. Pimples, blackheads, roughness and redness of the skin, irritation and eczema disappear, and the skin is soft, smooth and velvety. All dealers, or Edmonson, Bates & Co., Limited, Toronto. Sample free if you mention this paper.

**Dr. Chase's
Ointment**

New Relief Maps Are Proving Of Great Value To Prospective Settlers

When the motorist consults his road map or the teacher in the schoolroom refers to the wall map, it is ordinarily a flat map. It shows the roads, railroads, rivers, lakes, cities, towns and the other features, all placed upon a flat surface. Hills and mountain ranges, valleys and prairie lands are not distinguished except perhaps by conventional signs or lines which assist the mind in its endeavor to picture the real aspect of the country.

Mountains, hills or ridges, if shown at all, may be indicated by shading or a system of fine radiating lines to represent shadow, or by a series of lines of equal elevations above sea level called contour lines. The latter method gives actual elevations of the land and is thus a much more precise method than the former as it conveys definite information to anyone experienced in "reading" the contour lines and gives an accurate mental picture of the configuration or relief of the ground.

Relief maps have thickness as well as length and breadth and one sees upon them the valleys and rivers and streams, the steep hillsides, the gentle slopes and level places. One sees where railways have to be located to get easy grades, where roads require to be diverted to avoid steep hills, what areas can be drained and the direction in which the outlet will be found, why some rivers are sluggish while others will furnish water power and many other things of interest. The engineer or municipal officer can explain clearly projects unfamiliar with maps.

In the opening up of a new country, relief maps lend invaluable help in that the layman and the prospective settler, often unaccustomed to the proper interpretation of contour lines, may obtain from them a clear understanding of the "lay" of the land beforehand, its proper drainage, the grades involved in hauling to market, and so on.

It was out of their need of some such means for illustrating the relief in territory where road construction, drainage, clearing of lands and other development work was proposed for soldier settlement that the Topographical Surveys Branch of the Department of the Interior began the making of these maps on a small scale. Where there was some specific purpose to warrant it, they have been made from time to time. These relief maps are constructed in such a way that after the first map is produced, duplicates are quickly and easily made at little cost.

Although there have been no attempts at distribution, these maps have attracted considerable attention and requests have come from various organizations to supply different models at cost.

The extended use of relief maps in the schools would be a valuable aid to the study of geography. They lend themselves to a more complete understanding of geographical terms as for instance for such features as ridges, spurs, scarps, cliffs, plateaus, etc. The relative elevations of various parts of the country studied would be seen at a glance. Drainage areas could be worked out by the class and the question of definite or indefinite water sheds dwelt upon. The location of railways, with reference to the configuration of the country, the grades encountered, and the necessity for winding courses through hilly or mountainous regions would be seen.

The Hottest Place

The hottest place in the world has been found by the United States Weather Bureau. It is in Death Valley, California, where a station has taken records of the temperature for a period of ten years. The extreme maximum temperatures show it to be the hottest known region on earth. A temperature of 131 degrees F. was recorded on July 10, 1913, and this is believed by meteorologists to be the highest natural air temperature ever recorded with a tested standard thermometer exposed in the shade under approved conditions.

An elephant is possessed of such a delicate sense of smell that it can scent a human being at a distance of 1,000 yards.

French Reclaiming Mines

Have Rebuilt 2,000 Miles of Galleries Destroyed by Germans

The task of reconstruction in the Nord and Pas de Calais among the coal mines destroyed by the Germans is being pushed on with feverish activity, according to the Paris correspondent of The Times, and every day brings the moment nearer when they will once more be in full swing.

The report of the work accomplished during 1921 shows wonderful results. In the Nord the four groups have been linked up again: pumping operations are virtually terminated at Azincourt, Thiencelle and Vimy; and at Escarpelle the lower stages of all pits will be dry by the end of this year.

The Amaury, d'Arenberg, Tempe, Roux and Blaise-Borne pits are now dry, and the remaining five pits will be cleared by June of next year. In Pas de Calais, at Doures Courrières, Lens and Lieven, many pits are already dry, and in others the water is fast disappearing from the bottom. Up to the present over 600,000,000 cubic feet of water have been pumped out.

Reconstruction of pit bottoms is proceeding apace, considering the appalling havoc wrought by the enemy. Nearly 2,000 miles of galleries had to be rebuilt, of which 600 miles had been abandoned during German occupation and 1475 miles systematically flooded. The reconstruction of the bottom is the all important task, and it can only be carried out step by step. The advance varies between forty and twenty inches a day.

Is the Earth Pear-Shaped?

Director of French Observatory Suggests Using Wireless to Find Out

Many of us laugh at the people who in past times thought the world was flat. But are the laughers any more correct in their belief that the world is round?

That it is a sphere, we know, because we can see it for ourselves when a ship sinks below the horizon. But it is not shaped like an orange, as many suppose. The "Globe" is not a strictly accurate expression for it.

Recent measurements by astronomers have led to the belief that its shape is like that of a pear. But more careful and systematic methods are needed to give us exact knowledge, and the director of a French observatory suggests that we can make absolutely sure by means of wireless.

If all wireless stations establish a time-chain, signalling to each other and recording the distances between them calculated by the transmission of time, a network of observations will be cast around the earth, and by working out the results its shape can be found.

This would be valuable as well as interesting; many calculations, not only of astronomers, but of navigators and geographers, would be affected by it. And if it were repeated at regular intervals, we should know whether the shape of the earth alters from time to time, and how the alterations are caused.

Business Honor

Louis K. Liggett, the well-known drug magnate who failed and then paid off his creditors in full, was congratulated by a Boston reporter on so highly honorable an act.

"I believe in business honor," said Mr. Liggett, "though the business honor of some men reminds you of the golf club that had to put up the rule:

"Notice—Members must refrain from picking up lost balls until they have stopped rolling!"—Minneapolis Tribune.

Record In Milk Production

Maple Leaf Jean, an Ayrshire cow, owned by Capt. A. Henry Higginson, of South Lincoln, Mass., has established a new world's record for her class by producing 18,078 pounds of milk in 300 days, it is announced by the Ayrshire Breeders' Association. Maple Leaf Jean won first prize three times at the National Dairy Show. She is a former Canadian grand champion.

Exploration Ship Coursing Back Home

Steamer Quest Is Not Suited for Antarctic Work

It is expected that the Quest, the exploration ship carrying the adventurous party commanded by the late Sir Ernest Shackleton will return to Southampton in September next. The vessel put in at Cape Town on her way home after carrying out the work of scientific observation and exploration which was originally intended. En route to this country she will visit Trinidad Island, in the South Atlantic. Commander Wild, who is in charge of the party, is bringing with him a film of birds and animal life, of which new specimens have been found, and complete geological and biological data gathered of unknown islands. "I am quite satisfied with the results of the expedition, but would like to have done more," he declared in an interview at Cape Town. "Future plans are uncertain, but we are not returning south. We may carry out some work in the Pacific, searching for lost islands. The ship is rather under-powered for Antarctic exploration."

The Amaury, d'Arenberg, Tempe, Roux and Blaise-Borne pits are now dry, and the remaining five pits will be cleared by June of next year. In Pas de Calais, at Doures Courrières, Lens and Lieven, many pits are already dry, and in others the water is fast disappearing from the bottom. Up to the present over 600,000,000 cubic feet of water have been pumped out.

Reconstruction of pit bottoms is proceeding apace, considering the appalling havoc wrought by the enemy. Nearly 2,000 miles of galleries had to be rebuilt, of which 600 miles had been abandoned during German occupation and 1475 miles systematically flooded. The reconstruction of the bottom is the all important task, and it can only be carried out step by step. The advance varies between forty and twenty inches a day.

Algeria has a river that literally is filled with ink, being formed by the union of streams, one of which is impregnated with gallic acid and the other with iron.

Vultures are used in Costa Rica to keep the streets clean by devouring the refuse on them.

"WELL, what in the world is that?" cried one of the Brownies pointing to a strange looking beast that was shambling slowly around the Get-Little-Pool towards Stella, the Wishing Fairy, who sat surrounded by her four Brownies.

"How should I know?" laughed Plimzie. "But I soon will, for I am going to find out, and I'll make our fat friend yonder drink from our magic pool so as to grow a bit smaller. He's too big for my liking!" And away he ran while the others waited.

It seems that the stranger was Mr. Sloth Bear and he had struggled the tremendous distance to the End-of-the-Earth, with a message for Mrs. Bear to the Fairy. He explained that he had left her at home, having a terrible time with three chubby little cubs.

"Those cubs of ours," he exclaimed apologetically, "are rascals. They are always rough and tumbling and running around in different directions until their poor mother is quite tired out and discouraged. She couldn't even leave them to come here herself; so I told her that I would and I could tell you her wish just as well as she could herself. Heavens! I ought to be able to, for I've heard her sigh and grunt often enough and groan about her wish. I know it backwards and forwards by heart!"

"Then tell it to me," laughed Stella.

"She wants to be able to keep those cubs more quiet . . . to make them 'stay put,' so to speak."

"That is easily done," the Wishing Fairy said gently. "When you reach home tell Mrs. Bear that she must force her cubs to scramble up on her back. If they won't do it, she can spank them soundly until they do. Once on her back (or yours either) they will be so afraid of falling off that they will give all their attention to hanging on. That alone will keep them busy as well as quiet! The Opossum babies do the same thing!"

How the Brownies laughed when they heard this! And so did Daddy Bear. He could hardly wait to get home and tell his wife the good news of how her wish had been granted.

But before he left, however, he first talked a lot about himself, so that by the time he was ready to go, those at the End-of-the-Earth knew pretty much all that there is to know of Sloth Bears.

Though they really belong to the great Bear family they are even more closely related to the Sloth, who, as you know, is the slowest of animals and delights in hooking his strong claws around a branch and hanging down in this strange position.

But Sloth Bears are very agile and active, and do not at all resemble the Sloths in their actions.

They travel around at night prowling here and there for food instead of going forth by daylight; and they eat berries and fruit as well as insects.

We especially like the Ants of our country" (which, by the way, is India) Mr. Bear said with a grunt, "and nothing is more fun than digging up an ant hill. The Ants run wildly around and then we just lick them up as fast as we can. When we tear open the nurseries of a hill, we suck up all the baby ants and eggs and, yum! yum! they are delicious.

"When we travel around, we always keep together . . . the whole family . . . cubs and all. And now," Daddy Bear murmured with a grin of pleasure, "now that you've granted my wife's wish, our travelling will be much easier than ever before; for now we will be able to manage those cubs of ours!"

Caterpillars And Other Insect Pests Destroyed By Use Of Airplanes

Discovers New Suns

Dr. Plaskett, Victoria Observatory, Finds New Heavenly Bodies

Twin suns, 52 quadrillion miles from the earth, have been discovered by Dr. J. S. Plaskett, director of the Dominion Astrophysical Observatory, Victoria, B.C., through the observatory's big 72-inch reflector telescope.

Scientists herald the discovery as the outstanding astronomical achievement of recent times. The suns have been named Plaskett, after their discoverer.

The light, which, travelling at the rate of 186,000 miles a second, started from these suns 5,000 years before there was any creditable human history on this earth, reached here only today.

An airplane travelling from this earth at the rate of 200 miles an hour would require 30,000 million years to reach these twin suns.

They burn at a temperature of 30,000 degrees Fahrenheit as they whirl around one another. One, the more massive, is 75 times the bulk of our sun. The lesser is 63 times heavier.

One is 15,000 times as bright as the sun, the other 12,000 times as bright. Plaskett is more than five times as large as any other known heavenly body.

Professor Harold Jacobs, of Columbia University, noted astronomical authority, declares it a "most remarkable investigation and discovery." It is outstanding among recent astronomical investigations, he says, and declares that the measurements recorded by Dr. Plaskett must be accepted as most reliable.

A piece of human bone will support half as much weight again as a piece of the best oak of the same thickness.

Yet another field of service has been found for the aeroplane and one that has already been essayed with marked success. Recent experiments in Ohio have shown it to be possible for caterpillars and other pests that wreak havoc in orchards and forests to be exterminated by a bombardment with chemicals from the air.

After a six-acre catalpa grove near Dayton had been stripped bare of leaves by caterpillars in two successive seasons and signs of a third year devastation had become apparent, some imaginative member of the Ohio Department of Agriculture conceived the idea of destroying the pests by means of a poisonous substance rained from the air.

The assistance of the United States army air service was enlisted and it detailed Lieutenant John McCready, holder of the world record for high altitude, to carry out the scheme.

Flying low and carrying a sifter charged with 600 pounds of arsenate of lead, the aviator manœuvred his craft along the windward side of the grove until he had literally drenched the whole plantation with the poison.

Next morning millions of dead caterpillars were found on the ground.

Incidentally, the catalpa trees also died. But it was not the chemical that killed them. It was just a case of calling in the doctor after it was too late to save the patient.

The trees had been so weakened by the three successive caterpillar assaults that they died of exhaustion.

It is the belief of the foresters that earlier use of the poison would have saved the entire grove.

Faith in this airplane treatment was, in fact, so firmly established that it is to be applied to another catalpa plantation near Troy, Ohio.

The United States Department of Agriculture has now become interested in this method of fighting forest pests. Experiments in treatment of trees by airplane operators are to be made.

Captain Robert E. Kinlock has been ordered to operate in New England. From a base at Concord, New Hampshire, he will fly over forests of Gunstock Mountain in Belknap County. In this experiment poison gas, instead of lead arsenate, will be tried.

"Bombs containing a recently evolved gas, harmless to human beings and to vegetation but deadly to tree pests, will be dropped over a wide area until the forests are thoroughly saturated with it.

Comparison of results in this with those obtained in Ohio will be made and the relative merits of the two treatments will be established.

The ravages of insects in orchards and in forests have been so alarming in recent years that the results of these experiments will be awaited with keen interest.

If successful, the treatment will open a new field for airplane activity that may be of incalculable value.—St. Thomas Times-Journal.

Fire Prevention Day

Co-operation of All is Sought by Government Proclamation

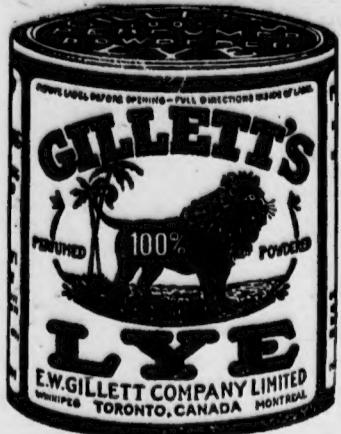

Because of the great loss of life and property by fire during the past decade, the Government, by proclamation, is calling upon all citizens to exercise special care and to observe October 9 as Fire Prevention Day.

According to the proclamation, citizens will be required to inspect their dwellings and remove all conditions likely to cause fire. Inspection is also applied to factories, public buildings, hospitals, and other institutions. The proclamation recommends fire drills in schools and all large stores and factories. Special instruction is recommended to be given by school teachers, municipal officers, and boy scouts.

In the bush, operators of lumber camps, settlers and hunters will be required to acquaint themselves with the regulations governing the prevention of fire. There is also a recommendation that all legislation and regulations dealing with fire prevention be given proper publicity.

Lord Kelvin, the famous physicist, entered the university at the age of eleven, and was a professor of natural philosophy at the age of 22.

WORLD HAPPENINGS BRIEFLY TOLD

The appointment of a permanent Canadian Trade Commissioner, together with an assistant, to Russia, has been authorized.

The Vancouver Harbor Commission has been authorized to strengthen the Ballantyne Pier sheds to carry grain conveyors.

The Government has endorsed a grant of \$66,965 to the province of Alberta "for the purpose of aiding and advancing the farming industry by instruction in agriculture."

The Government has curtailed the weekly close salmon fishing at Rivers Inlet, B.C., from midnight on Friday to 6 p.m. Sunday for the balance of the 1922 fishing season.

Because of the great loss of life and property by fire during the past decade, all citizens have been asked to observe October 9 as Fire Prevention Day.

Djemal Pasha, former Minister of Marine in the Turkish Unionist Government, chief of staff of the Afghan army, has been assassinated. Two Armenians are charged with the crime.

The reputation of the province of Quebec is not to be hurt by the recent declarations to the effect that imported cheese of inferior and dangerous quality had been sold on the British markets, states Hon. J. A. Caron, Minister of Agriculture.

The late Sir John Eaton's palatial private car, "Eatonian" has been sold in Montreal to the Canadian Pacific Railway Company. The car was furnished throughout with the most modern and luxurious manner and originally cost over \$100,000.

Because of the political and religious unrest in Ireland, which has brought practically the whole flax industry there to a standstill, three manufacturers of Armagh, Ireland—Joseph Marshall, David McClelland and R. R. Louden—have come over to Canada with a view to an investigation that may duplicate Ireland's flax industry in the Dominion.

Circle Tours Through the Canadian Pacific Rockies

Delightful Trip Afforded for Tourists Over C.P.R.

By the most magnificent mountain and inland water trip in the world, passing through beautiful Banff, lovely Lake Louise, Field and Glacier thence to Arrowhead—steamer through the Arrow and Kootenay Lakes, winding in and out past majestic mountain peaks—touching at West Robson and Nelson enroute.

This delightful trip can be made in the opposite direction if desired and at remarkably low cost.

Any Canadian Pacific ticket agent will gladly give full information and arrange details.

On the Marriage Day

Romance usually ceases, and history begins—and sore corns begin to go when "Putnam's" is applied. It takes out corns, roots, branches, stems—no trace of a single corn left after Putnam's Painless Corn Extractor has done its work, 25c at all dealers or The Catarrhozine Co., Montreal.

Quite Correct

Mrs. Scroggins.—She told me that when 'er darter got married the bridegroom gave 'er a 'orse and a trap.

Mrs. Jorkins.—Yes, I know—a clothes 'orse and a mouse trap.

THE REASON WHY ANAEMIA PREVAILS

The Strenuous Conditions of Life To-day Responsible

Mothers who remark that girls to-day are more prone to anaemia than the girls of a generation ago, should look back at the surroundings in which they and their companions lived. They would easily see the reason in life's altered circumstances to-day.

Now the school girl's life is more strenuous; her more numerous studies are a severe tax upon the strength. Also, girls enter business soon after leaving school—at an age when they most need rest and outdoor life. Their womanly development is hampered by the stress of working hours, hurried and often scanty meals. Girls are more liable to bloodlessness to-day, but there is this consolation that this condition is now more easily remedied than in the years past. Such medicine as Dr. Williams' Pink Pills have helped thousands of weak, anaemic girls and women, simply because they contain the elements necessary to enrich the blood which means good health and vitality.

This is proved by the statement of Miss Eldora Acker, Lake Pleasant, N.S., who says:—"I shall be glad if some other ailing girl will profit by my experience with Dr. Williams' Pink Pills. I was very much run down; my face was pale and there were dark circles around my eyes. My appetite was bad, and I had no ambition to do anything or go about. I had once before been helped by Dr. Williams' Pink Pills and decided to try them again. It proved a wise decision, for in less than two months I felt in every way better; had a splendid appetite, the tired feeling disappeared, and I can work with enjoyment. Naturally I think there is no better medicine for young girls than Dr. Williams' Pink Pills."

You can procure Dr. Williams' Pink Pills through any dealer in medicine or they will be sent to you by mail at 50 cents a box or six boxes for \$2.50 by writing direct to The Dr. Williams Medicine Co., Brockville, Ont.

Walruses are gentle except when attacked.

Turks Strangle Criminals

In Turkey strangling and sewing a criminal up in a bag and throwing him into the sea are common modes of punishment.

Fresh Supplies in Demand.

Wherever Dr. Thomas' Electric Oil has been introduced, increased supplies have been ordered, showing that wherever it goes this excellent Oil impresses its power on the people. No matter in what latitude it may be found its potency is never impaired. It is put up in most portable shape in bottles and can be carried without fear of breakage.

The keeping of pigeons in England was introduced by the Romans, who used them for carrying, as well as for the table.

Corns cause much suffering, but Holloway's Corn Remover offers a speedy, sure, and satisfactory relief.

No. 10 Downing Street has been the home of the prime ministers of England for almost two hundred years.

Minard's Liniment Relieves Neuralgia

There is no such thing as a thunderbolt, but the name is frequently given to a meteorite, or more often a particularly dangerous form of lightning.

TO RETAIN GOOD HEALTH FOLLOW THIS ADVICE

Most important of all is proper attention to the bowels. Avoid constipation—it is the health-killer of to-day. Harsh griping medicine is ruinous—beware of it. Best results, follow a remedy like Dr. Hamilton's Pills which relieve costiveness promptly and tone the bowels so that constipation becomes a thing of the past. No distress or inconvenience attends the use of Dr. Hamilton's Pills, which are famous for their mildness and efficiency. For headache, biliousness, indigestion and liver complaint, Dr. Hamilton's Pills are just what you need. Thousands maintain their health by regulating frequently with Dr. Hamilton's Pills, 25c at all dealers or The Catarrhozine Co., Montreal.

Could Not Eat

Constipation is caused by a torpid condition of the liver. Dosing with salts, castor oil, etc., to move the bowels, cannot afford more than temporary relief.

If you are to rid yourself of this ailment and the scores of annoying symptoms and diseases which come in its wake, it is necessary to get the liver right by such treatment as is suggested in this letter:

Mrs. Alvin Richards, R. R. No. 1, Seeley's Bay, Ont., writes:

"For two years I was afflicted with indigestion, and in the morning when I got up my breath was bad. I had a poor appetite, and just felt like eating certain foods. I used many different medicines as a laxative without benefit, and the doctor's medicine did not help me at all. Finally I tried Dr. Chase's Kidney-Liver Pills, and found them better than anything I had ever tried. I can highly recommend them to anyone troubled with constipation or kidney troubles."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25c a box, all dealers, or Edmanson, Bates & Co., Ltd., Toronto.

Many people can't drink tea or coffee without punishment

If you are nervous and irritable—if you lie awake at night—if you are troubled with indigestion—try Instant Postum for ten days and note the improvement in your health.

You have nothing to lose and everything to gain. The full, rich flavor of Instant Postum makes it a most delightful, satisfying beverage, and the results of its use, instead of harmful table beverages, are a clearer head, sounder, more refreshing sleep, and a fuller, healthier enjoyment of life.

This happy, wholesome beverage gives you all the pleasure and satisfaction of your usual steaming cup of flavor delight, but exacts none of the penalties which follow the use of harmful table beverages.

A Sad Accident

Mrs McGinnis Killed in Auto Accident

A sad accident occurred Wednesday evening when Mr Inches and Mrs McGinnis and daughter met with an accident at the crossroads of Gamble school. Mr Inches was going up the hill to turn around and come back, when the engine stalled, the brakes did not hold and the car went over the bank before it could be stopped. All were thrown out and Mrs McGinnis received fatal injuries of which she died the next day. Mr Inches and the child escaped uninjured. At the inquest the jury pronounced verdict accidental and attached no blame on either car owner or driver as it appeared that the brakes could not hold on any car going over that embankment.

Mr MacLean left on Tuesday to visit friends.

Mr and Mrs Hattie have returned from their holidays.

Mr and Mrs John Moulds of Boston are the guests of Mrs H. Peters, of Carbon. Mr and Mrs Moulds are on an extended trip across Canada and the United States. Mrs Moulds is Mrs Peters' sister. They expect to spend two weeks here.
